SUMMARY

Computer Science undergraduate seeking an internship to apply and expand technical skills. Passionate about software development and machine learning, with proficiency in Python, Java, HTML, ReactJS, MySQL, and Git. Skilled in problem-solving, critical thinking, and designing efficient algorithms. Experienced in teamwork and effective communication. Eager to contribute innovative ideas and grow in a dynamic company environment while leveraging technical expertise to support business goals

PROJECTS

Gamified ERP mobile app for OCD Support - <https://resilify.live> Oct 2024 - Present

- an AI-powered mobile application designed to support OCD patients through gamified therapy.
- Utilized Flutter, Flask, and Firebase for full-stack development, ensuring seamless cross-platform functionality.
- Integrated AI-driven features, including intrusive thought looping, guided exercises, and personalized recommendations.
- Designed an engaging UI/UX using Figma to enhance user experience and accessibility.
- Contributed as a full-stack developer, handling both front-end and back-end implementation.

GitHub : <https://github.com/Resilify>

E-commerce Website – <https://www.vsmartfashion.lk> Aug 2024 - Sep 2024

- Developed VSmart Fashion, an e-commerce website for a fashion retailer, enabling seamless online shopping and order management.
- Implemented a responsive and user-friendly UI to enhance customer experience across devices.
- Implemented ReactJS for the frontend and Strapi as the headless CMS.
- Deployed using Nginx on a VPS hosting environment for optimized performance.

Event Ticketing System Dec 2024

- Developed an Event Ticketing System, enabling users to browse, book, and manage event tickets seamlessly.
- Built with Angular and Spring Boot for a scalable and responsive web experience.
- Implemented secure authentication and payment processing for safe transactions.
- Designed an intuitive admin panel for event organizers to manage ticket sales and user data.
- Integrated real-time updates to track ticket availability and bookings efficiently.

GitHub: <https://github.com/KaveeshTennakoon/EventTicketing>

Movie Recommendation System May 2024

- Developed a cosine similarity-based recommender to suggest movies based on selected titles.
- Implemented Scikit-learn's TF-IDF vectorization and cosine similarity for efficient filtering.
- Integrated the TMDb API to fetch and display high-quality movie posters and details dynamically.
- Built the backend using Django and Python, ensuring a scalable and efficient recommendation.
- Designed a simple yet responsive front-end using HTML, CSS, and JavaScript.

GitHub: <https://github.com/KaveeshTennakoon/MovieRecommendation>

Word Counter May 2024

- Developed a real-time Word and Character Counter web application.
- Built the backend using Django and Python, ensuring fast and accurate text processing.
- Implemented real-time text analysis, displaying live updates as users type.
- Handled the full development cycle, from backend logic to front-end UI design and deployment.

EDUCATION

B.Sc. (Hons) Computer Science
Informatics Institute of Technology

Sep 2023 - Present

Cambridge Advance Level
St. Nicholas International School

May 2023

Cambridge Ordinary Level
OKI International School

May 2021

ACHIEVEMENTS

- Deputy Head Prefect at OKI International School from 2019-2020
- Champion - Under 12 Boys Puttalam District Youth Chess Championship - 2017
- First Runner-up - Codemize-23 Techfest for Gen-Z organized by BCI

EXTRA-CURRICULAR ACTIVITIES

- IEEE Club of IIT - Member (2024 - present)
- Mozilla Club of IIT - Member (2023 - present)
- OKI International School Table Tennis Club - Member (2018 - 2020)
- OKI International School Chess Club - Leader (2016-2018)

SKILLS

- Languages - Python, Java, HTML, CSS, Javascript
- Frameworks - ReactJS, AngularJS, Springboot, Django
- Database - MySQL
- Other - Git
- Soft Skills - Communication, Teamwork, Adaptability
